

Alert number

[A12/00007/22](#)

Product

Tattoo ink

Risk type

Chemical

The product contains the aromatic amine o-toluidine (measured value: 5.7 mg/kg). O-toluidine may cause cancer and might induce mutations.

The Council of Europe Resolution ResAP (2008)¹ on requirements and criteria for the safety of tattoos and permanent make-up, recommends that aromatic amines with carcinogenic, mutagenic, reprotoxic or sensitising properties should neither be present in tattoos and permanent Makeup products nor released from azo-colourants.
